Report of Superintendent of Schools

To the School Board and Citizens of Strafford:

“The school is the foundation of the nation. If the American schools fails, America will fail. Education is the mother of civilization. Where there has been no education there has been no civilization. Civilization has come down through the ages in a chariot built by the forces of education.”

It is recognized today that the acquisition of knowledge is not the chief aim of the educative process, but all instruction is for the benefit of the physical, moral and mental development of the child. Physical fitness is the foundation of good citizenship, so provision for physical education and welfare has found its way into our schools. Medical examination, instruction in hygiene and sanitation, and the safe-guarding of the health of the pupils, all have a place in our school system. The most important element of success in community life is team work, with a common purpose. Much is being done in our schools, in training the children to work together in plays, games and other activities. To recognize the rights of others, and to realize that freedom and liberty for the whole group, depends upon the willingness of the individual to conform to rules and laws established for the good of all.

Forward steps are being taken to bring the class work up to the highest degree of efficiency possible. In the study of history for example, democracy demands that pupils of today shall study the progress of nations and races, rather than the story of kings and generals. Each period studied should be con-

trusted with the every day conditions of our present time. Pupils should be taught that it is their duty to enter into the activities and responsibilities of citizenship, with a spirit of loyalty to their community, state and nation. We are training children who face not yesterday, but tomorrow.

Much research work has been done in recent years, establishing the methods that are most effective in class room instruction, and culling out the things that have little or no educational value. We are trying to profit by the findings of this research work and to incorporate into the Strafford schools those things which make for efficiency and to eliminate things which have no value. It is our purpose to have the pupils get the largest possible return for the time put in, and for the district to get the best for its money spent for school purposes. The use of standard tests this year enables us to find the strong and weak points in our schools with accuracy, and to compare the school work of Strafford with that of hundreds of other schools throughout the country who use the same tests. This helps us to carry the classification of pupils into grades with a greater degree of exactness. It also shows the weakness in any particular subject, and thus makes clear where more stress should be placed to bring the work up to normal.

In regard to consolidated schools vs. the one room school, it is suggested that a one room rural school may be conducted to good advantage, provided the following standards are met.

First. When an attendance of fifteen or more pupils is assured.

Second. When there is a school house wholesome, attractive, well equipped, meeting state requirements in physical appointments and used as a community center at least six times each year.

Third. When an experienced and contented teacher can be secured. By contented we mean satisfied with her salary, and willing to become an active member of the community in which she finds herself.

Your attention is directed to several of the school buildings which need extensive repairs and improvements. I hope the district may see fit to make an appropriation to put one or two buildings in good condition each year, until all are comfortable, attractive and sanitary.

The following regulations concerning the attendance of children under eight years of age have been adopted by the School Board and will become effective September, 1922:

1. No pupil will be admitted to school, who is less than five years, eight months of age, on September 1st of the year he enters.
2. Pupils, beginning the first grade, must enter during the first three weeks of the fall term.
3. Attendance must be regular, except in case of sickness of pupil or quarantine; a pupil less than eight years of age may be dropped from school for irregular attendance.

In conclusion I wish to express to the members of the school board and to the teachers my appreciation of their hearty co-operation in the school work.

Respectfully submitted,

CLARENCE C. SANBORN,

Superintendent of Schools.
